## The State of the Rock River Watershed

*A watershed planning group meeting to explore the progress and needs of the Rock River Watershed for improved soil and water health*

The Rock River Watershed has been the focus of prioritized technical and financial support from the Vermont Agricultural Water Quality Partnership over the past 4 years with *one year remaining for prioritized assistance.*

This meeting will focus on the progress made in the Rock River watershed through the strategic plan to protect and improve water quality and reduce phosphorus runoff from agricultural fields.

**We will assess our progress and evaluate the remaining conservation needs.**

**Join us to learn more about the successes that have been achieved thanks to the conservation efforts of farmers in the watershed.**

*Pizza and refreshments will be provided.*
